Sell Music Services on Fiverr

How to position mixing, mastering, and production as premium services — and move from \$63 to \$200+ per order.

AVG RATING

\$63

→ \$200+ GOAL

Who This Is For & How to Use It

If you finished Course 01 — or if you already have beats on Fiverr and orders coming in — this is the next move. Beats have a ceiling. My average order value across 2,019 orders sits at \$63. That number is **pulled up by mixing and production service orders** — where the floor is \$80 and the ceiling is \$300+, without delivering more than you would for a \$35 beat.

This PDF closes that gap. Five modules. All scripts copy-paste ready. No theory.

- **Module 1** — Why "mixing" earns \$30 and "outcomes" earn \$150. The positioning shift that changes everything.
- **Module 2** — How to build a service gig that ranks, converts, and prices correctly. Different rules from beat gigs.
- **Module 3** — Client onboarding and communication. Services have more back-and-forth — here's how to handle it without disputes.
- **Module 4** — Pricing, upselling, and the reference track close. How to move a \$50 brief into a \$200 conversation.
- **Module 5** — 5-star reviews for service work and turning single orders into repeat clients worth \$3,000+.

Fiverr analytics showing \$127k / 2,019 orders

Read it once straight through. Implement Module 1 before touching anything else. The sequence matters — positioning first, gig setup second, client work third.

MODULE ONE

Stop Selling "Mixing"

The word "mixing" tells a buyer what you do. It doesn't tell them what they get. This module covers the shift that separates the \$30 gig from the \$150 gig — and it has nothing to do with your skill level.

- 1.1 — WHY "MIXING" SELLS FOR \$30
- 1.2 — THE OUTCOME REFRAME
- 1.3 — THE 4 SERVICES WORTH YOUR TIME
- 1.4 — THE SERVICE LADDER
- 1.5 — THE 3 BUYER TYPES WHO PAY \$150+

01

1.1 Why "Mixing" Sells for \$30

Search "mixing" on Fiverr. 40,000 gigs. The first page is sellers at \$5-\$15. Buyers don't know what differentiates a \$15 mix from a \$150 one — so they default to price. That's not a talent problem. It's a framing problem. When you say "I will mix your song," you are selling a **process**. Buyers don't buy processes. They buy **results**.

SELLING A PROCESS	SELLING AN OUTCOME
"I will mix your song"	"Your track, label-ready in 24h"
"Professional mixing service"	"Ready for Spotify / Apple Music"
"I use Pro Tools and Waves"	"Trusted by 200+ artists — 5.0 stars"
"Fast delivery"	"Delivered in 24h — your deadline, not mine"

1.2 The Outcome Reframe

Take every sentence in your current gig and ask: **is this about me, or about what the buyer gets?** Keep anything that passes. Cut everything else.

BEFORE → AFTER

Before: "I am a professional mixing engineer with 8 years of experience in hip-hop and trap production. I use industry-standard tools..."

After: "Your track, radio-ready in 24 hours. 2,000+ orders on Fiverr — 5.0 stars. Send me your stems and I'll send you a record."

1.3 The 4 Services Worth Your Time

SERVICE	ENTRY	CEILING	NOTES
Mixing & Mastering	\$50	\$300+	Start here. Most buyers, easiest to price.
Ghost Production	\$80	\$500+	Add after mixing reviews are stacked.
Music for Video / Ads	\$60	\$400+	Fastest-growing segment right now.

SERVICE	ENTRY	CEILING	NOTES
Vocal Production	\$40	\$200+	Easy add-on to existing beat orders.

1.4 The Service Ladder

This turns a \$35 beat buyer into a \$500 full-production client. Most producers never build it because they treat each service as a separate business instead of a connected system.

1.5 The 3 Buyer Types Who Pay \$150+

- **The Label-Ready Artist:** Recording seriously, submitting to playlists, has a release deadline. Cares about quality over price. Budget \$100-\$300. These are your ideal clients — find them by genre tag and target your gig copy directly at them.
- **The Content Creator:** YouTube, TikTok, Podcasts. Needs music for brand or video. Less emotionally attached to the track — just needs it to sound professional and clear licensing. Budget \$60-\$200. Turnaround is a feature worth 2× the price.
- **The Repeat Client:** Has worked with you before. Trusts your ears. Will pay your rate without negotiation because the alternative is starting over with someone new. Budget: whatever you charge. Worth 10× what it costs to keep them.

You don't need all three buyer types. One repeat Label-Ready Artist ordering 4× a month is \$400-\$600 in predictable monthly revenue from a single relationship.

MODULE TWO

Building Your Service Gig

A service gig is not a beat gig with different deliverables. The title formula, tags, tier structure, and gallery approach all follow different rules. Build it wrong and everyone picks Basic – or nobody clicks at all.

- 2.1 – SERVICE GIG TITLE FORMULA
- 2.2 – TAGS FOR SERVICE GIGS
- 2.3 – TIER SETUP FOR SERVICES
- 2.4 – PRICE MAPS BY GENRE
- 2.5 – GALLERY & PORTFOLIO
- 2.6 – FAQs THAT HANDLE OBJECTIONS

02

2.1 Service Gig Title Formula

Beat gig titles win on genre specificity. Service gig titles win on **outcome + credibility + niche**.

FORMULA

I will **[outcome verb]** your **[specific track type]** **[credibility anchor or platform]**

- "I will mix and master your hip-hop track to streaming standards" — outcome (streaming standards), niche (hip-hop)
- "I will professionally mix your R&B vocals and instrumentals" — specific deliverable, genre signal
- "I will master your track for Spotify, Apple Music, and YouTube" — platform-specific, buyer knows exactly what they get

2.2 Tags for Service Gigs

Five tags. Go specific — broad terms like "music" or "audio" are dominated by sellers with 10,000 reviews. You have zero chance ranking there as a growing gig.

MIXING GIG TAGS

mixing and mastering

hip hop mixing

trap mix master

vocal mixing

music production

MASTERING GIG TAGS

audio mastering

spotify mastering

loudness mastering

stem mastering

online mastering

GHOST PRODUCTION TAGS

ghost producer

custom track

original music

royalty free music

music for artists

2.3 Tier Setup for Services

Service tiers use **revision limits** and **scope** as the primary upgrade lever — not file format. Build them wrong and everyone stays on Basic.

BASIC

\$50

✓ Stereo mix (MP3 + WAV)

✓ 2 revisions

✓ 2-day delivery

✓ No stems

✓ No mastering

STANDARD ★ — MOST ORDERS

\$90

✓ Mix + Master (WAV)

✓ 3 revisions

✓ 1-day delivery

✓ Streaming-optimized

✓ Reference track match

PREMIUM

\$150

✓ Mix + Master + Stems

✓ Unlimited revisions

✓ Priority 1-day delivery

✓ Vocal production

✓ Alternate mix version

The Standard tier is your money-maker. Price it at roughly 1.8× Basic. Most buyers self-select into Standard because the upgrade feels proportional to the value — and the mastering inclusion alone justifies the jump from \$50 to \$90.

2.4 Price Maps by Genre

GENRE	BASIC	STANDARD	PREMIUM
Hip-Hop / Trap	\$40-\$60	\$80-\$100	\$130-\$180
R&B / Soul	\$60-\$80	\$100-\$130	\$180-\$250
Afrobeats / Amapiano	\$50-\$70	\$90-\$120	\$160-\$220
Pop / Indie	\$70-\$100	\$120-\$160	\$200-\$300
Music for Video	\$60-\$80	\$100-\$150	\$200-\$400

2.5 Gallery & Portfolio for Service Gigs

Service gig galleries are harder than beat gig galleries because you can't do a visual before/after. Here's the image order that works:

- **Image 1 — Result statement:** Key stat + outcome. "2,000+ orders. 5.0 stars. Your track, label-ready in 24h." Same design language as your thumbnail. Buyers scroll the gallery before reading the description.
- **Image 2 — Social proof:** Your analytics screenshot or a grid of review quotes. Proof here — not buried in the description.
- **Image 3 — Deliverables breakdown:** Visual of your tier comparison. Mobile buyers skip reading.
- **Image 4 — Process flow:** "You send stems → I mix → Delivered in 24h." Reduces buyer anxiety before they order.

2.6 FAQs That Handle Objections

Four FAQs. Every service gig needs these. They cut pre-order message volume by half and signal experience immediately.

- **FAQ 1 — What do I need to send?** "Send your stems as WAV at the project sample rate (44.1kHz or 48kHz). Label each stem clearly: KICK, SNARE, BASS, LEAD, etc." Saves 3 messages per order.
- **FAQ 2 — What counts as a revision?** "A revision is any change to the mix that was part of the original brief. A new creative direction after delivery is a new order." Define the boundary before orders start.
- **FAQ 3 — Will my track sound like [reference]?** "I use your reference as a target — same energy, similar frequency balance. I won't clone another artist's sound, but I'll get as close as professionally possible."
- **FAQ 4 — Do I own the master?** "Yes. Once delivered, the mixed/mastered file is 100% yours. I retain no publishing or ownership rights to the audio." Content creators panic about copyright — remove the anxiety upfront.

These four FAQs alone will cut your pre-order message volume in half and filter out buyers who weren't serious before they placed an order.

MODULE THREE

Client Onboarding

Services have more back-and-forth than beats. A buyer can send bad stems, unclear references, or change direction mid-project. This module covers how to qualify buyers before they order, get the right info upfront, and manage every edge case without disputes.

- 3.1 — THE PRE-PURCHASE QUESTION
- 3.2 — THE BRIEFING TEMPLATE
- 3.3 — WHEN STEMS ARRIVE BROKEN
- 3.4 — MANAGING DIRECTION CHANGES
- 3.5 — THE DELIVERY FILE CHECKLIST

03

3.1 The Pre-Purchase Question

One question, asked before every order, cuts bad clients by half. Serious buyers answer immediately. Buyers who'll be a problem either don't answer or give vague non-answers that tell you everything.

PRE-PURCHASE MESSAGE

Hey — before you place the order, quick question: what's the genre/vibe, and do you have a reference track in mind?

Just want to make sure we're aligned before you send the stems. Happy to answer anything else too.

What the reply tells you:

- **Detailed reply + reference link:** This buyer knows what they want. Order will go smoothly. Respond and close it.
- **"Just make it sound good":** Red flag. Define "good" together before the order starts — or pass on it.
- **No reply, but they order anyway:** Send the briefing template the moment the order lands. Don't start without the brief.

3.2 The Briefing Template

Send this the moment an order is placed. Gets you everything you need to start — and signals professionalism instantly.

BRIEFING MESSAGE — SEND IMMEDIATELY ON ORDER START

Hey [Name] — thanks for the order, excited to work on this.

To get started, please send:

1. **Stems** — WAV files, labeled (Kick, Snare, Bass, Lead, etc.), at your project sample rate
2. **Reference track** — a song that represents how you want this to sound
3. **Any specific notes** — more low end, brighter hi-hats, keep the 808 punchy, etc.

I'll get started once I have these and update you when the first pass is ready. Typical turnaround: [X] hours from receiving files.

You responded to brief [Electronic/Trap Beat for Product Launch Teaser](#)

Hey it's Sfooxbeats a music producer and beat maker with +2000 completed orders here in fiverr

More details needed about the brief

I'm definitely interested in working on this project. I just had a couple of questions before sending an offer:

• What is your ideal turnaround time for the project?

• I noticed the budget listed is up to \$50. For ad music production projects like this, our work usually starts around \$250–\$400, depending on the complexity and deliverables. Is there flexibility on the budget range?

For the deliverables, we provide:

• High-quality MP3 + WAV files

• Full stems

• The FL Studio project file

• A screen recording / video capture of the project arrangement if needed

Looking forward to hearing more and seeing if we're a good fit for this project.

Description

About the client

Overview

One-time job

Ongoing work potential

I'm looking for a custom electronic/trap-influenced beat for a 45-second product launch teaser video for an upcoming fitness tracker. The beat should convey high energy, modern tech, and movement.

Scope of work

-Create one 45-second electronic/trap-influenced beat, 130 BPM, key of B minor.

-Structure: 8-bar build-up, 8-bar drop, 4-bar outro with clean ending (not a fade).

-Deliver as WAV (44.1 kHz/24-bit) and MP3 (320 kbps).

-Provide one alternate mix with the 808 bass reduced by 6 dB and hi-hats pulled back for a version where voice-over may be added....

Read more

References

-Energy: Apple Watch launch ad music

-Sound: Epic ODESZA-style cinematic builds

-Synth tone: Serum-style modern wavetable leads

-Sound design elements: Punchy 808 kick with fast decay, crispy trap hi-hat rolls, detuned supersaw lead, white noise risers in build-up, sub-bass glide on the drop's first ...

Read more

Additional information

-Must sound polished on both studio monitors and phone speakers (check for mono compatibility)

-Avoid any audio that could be mistaken for a notification or alarm sound (beeps, chimes near phone frequency ranges 1-4 kHz)

LOOPGEM • SELL MUSIC SERVICES ON FIVERR

03 / CLIENT ONBOARDING

3.3 When Stems Arrive Broken

Happens on every 10th order. Clipped files. Wrong sample rate. A single stereo bounce instead of stems. You cannot mix what you can't work with — but how you handle it determines whether you get 5 stars or a dispute.

RESPONSE TO BAD STEMS

Hey — got the files, thank you. I want to flag something before I start: *[specific issue — e.g., "the kick stem is clipping / wrong sample rate / arrived as a stereo bounce instead of stems"]*.

This will affect the final mix quality, so I want to get it right. Could you *[specific fix — e.g., "re-export the kick without limiting / bounce at 44.1kHz / send individual stems"]*?

Should only take a few minutes. Once I have the corrected files I'll get started immediately.

3.4 Managing Direction Changes

You deliver a mix. Buyer says "I want it completely different now." This is a scope change — not a revision. Name it clearly, offer a path forward.

DIRECTION CHANGE RESPONSE

Totally get it — creative direction sometimes evolves during the process.

What you're describing is a different mix direction than what we started with, so this would be outside the standard revision. I can do a full re-mix based on the new reference for an additional \$*[X]*. Happy to do it — just want to make sure we're aligned on what it covers.

3.5 The Delivery File Checklist

- | | |
|---|---|
| ☐ Stereo mix — WAV 24-bit at project sample rate | ☐ MP3 320kbps — labeled with track name |
| ☐ Master version (if included) — LUFS-compliant | ☐ Stems (if Premium) — individual WAV in a ZIP |
| ☐ File naming: [Artist]_[Track]_Mix_SFX.wav | ☐ No clipping on any file — check before sending |

real brief response conversation on Fiverr

MODULE FOUR

Pricing & Upselling

A buyer who posts a brief at \$50 often has a real budget of \$200+. They listed \$50 because that's what they think mixing costs – not because it's all they have. This module closes that gap every single time.

- 4.1 – THE REFERENCE TRACK CLOSE
- 4.2 – MOVING A \$50 BRIEF TO \$200
- 4.3 – GHOST PRODUCTION: PRICING & LEGAL PROTECTION
- 4.4 – MUSIC FOR VIDEO – FINDING THE BUYERS
- 4.5 – RAISING PRICES AS A SERVICE SELLER

04

4.1 The Reference Track Close

The reference track conversation is the highest-value moment in any service negotiation. Most producers use it to get technical information. You should use it to pre-sell the upgrade. When a buyer sends a reference, they're telling you what their song should sound like — and that reference cost \$50,000 to make. If you can get close to it, that's worth far more than \$50.

REFERENCE TRACK CLOSE — UPGRADE TRIGGER

[Buyer sends reference track]

You: Great choice — that mix has a really specific sound. Heavy low-end glue, the mids are scooped so the vocal sits on top without competing. That's exactly the kind of work I do.

One thing: getting close to that reference really benefits from the mix + master combo — the mastering stage is what gives it that "finished record" compression and loudness. My Standard package covers both for \$90. Want to go that route?

Why this works:

- You demonstrated you can hear what makes the reference special — instant credibility
- You connected that specific quality to your Standard package — not a generic upsell
- You asked directly. Confidence closes orders. "If you want" hedging loses them.

4.2 Moving a \$50 Brief to \$200

SAME 20 ORDERS / MONTH — DIFFERENT PRICING

\$500

\$25 AVG
Beat-only

\$1,800

\$90 AVG
Standard mix+master

\$3,000

\$150 AVG
Premium full package

4.3 Ghost Production — Pricing & Legal Protection

Highest-value service on this list. You make a track. They release it under their name. You get paid and walk away. Done right, one ghost production order earns more than 10 beat sales.

TIER	PRICE	WHAT'S INCLUDED
Basic	\$80–\$150	Track + WAV stems. No revisions. Non-exclusive.
Standard	\$200–\$350	Custom track + stems + mix. 2 revisions. Exclusive.
Premium	\$400–\$600+	Custom + mix + master + stems + project file.

- **State it in the gig:** "All ghost productions include full copyright transfer. You own everything. I retain no publishing rights."
- **Confirm in delivery:** "This track is now 100% yours — all rights transfer with this delivery."
- **Never send files outside Fiverr** — the platform's delivery system protects you. Files are locked until the buyer accepts.

4.4 Music for Video — The Fastest-Growing Segment

- **Price by usage, not time:** A 30-second ad jingle earns more than a 3-minute track for an independent artist. Always ask what it's for.
- **Key tags:** "royalty free music," "background music for YouTube," "music for podcast intro," "ad music production"
- **License language removes anxiety:** "YouTube-safe, full sync license included." Content creators panic about copyright strikes — eliminate it upfront.

4.5 Raising Prices as a Service Seller

Service prices are harder to raise because buyers develop expectations from their first order. The signal to raise: **your revision rate drops below 20%** — you're delivering consistently and buyers are happy first time. Never raise more than 20–25% at once. Go from \$50 to \$65, not \$50 to \$90. Let it stabilize. Watch conversion rate in analytics. If it barely moves, keep going.

If you're fully booked at current prices — you're underpriced. The market is telling you directly. Raise prices until you're 80% booked. That's the sweet spot.

MODULE FIVE

Reviews & Repeat Clients

Service reviews are harder to earn than beat reviews. The quality is subjective, the delivery involves back-and-forth, and satisfied buyers are more likely to stay quiet. This module fixes all of that – and turns single orders into long-term income.

- 5.1 – THE MIXING DELIVERY MESSAGE
- 5.2 – REMOVING SUBJECTIVITY FROM REVIEWS
- 5.3 – THE "STUDIO SESSION" FOLLOW-UP
- 5.4 – BUILDING A CLIENT ROSTER
- 5.5 – FROM ONE-OFF TO RETAINER
- 5.6 – HANDLING NEGATIVE REVIEWS

05

5.1 The Mixing Delivery Message

A mix delivery is different from a beat delivery. The buyer sent you something personal — acknowledge that before leading with the files.

MIXING DELIVERY MESSAGE

Here's your mix — I had a lot of fun with this one.

I leaned into the low-end the way the reference called for — the 808 sits right under the vocal without competing. Let me know how it sounds on your monitors and in your car.

Included: Stereo mix (WAV + MP3) · Master version (LUFS-optimized for streaming)

If anything feels off — too bright, kick too forward, whatever — let me know specifically and I'll adjust. One revision is included, use the revision button.

If this is heading to a release, let me know — happy to work on the next one.

The screenshot displays a music delivery interface. On the left, under 'DELIVERY #1', a message from 'Me' (sfooxbeats) thanks the buyer for their business and provides a download link for 'BARA...zip (124 MB)'. Below the message, a status bar indicates 'The order was completed' on May 22, 2026, at 1:44 AM, followed by a 5-star review from 'antoniodela' dated May 22, 2026, at 1:45 AM. The review section, titled 'ANTONIODELA'S REVIEW', shows 'antoniodela's message' with a 5-star rating and the text 'Top top top 🍌🍌🍌'. A note at the bottom states 'Some information is shown in English language. [Translate](#)'. On the right, the 'Order details' section shows the buyer's profile 'antoniodela' with a 'View conversation' button. Below this, order information is listed: 'Ordered by antoniodela', 'Delivery date May 23, 12:38 AM', 'Total price \$150', and 'Order number #FO222BE993008'. A 'Track Order' section shows 'Delivery reviewed' and 'Order completed' with checkmarks. A 'Private note' section has an 'Add Note' button. At the bottom, a 'Support' section includes links for 'FAQs' and 'Resolution center'.

real delivery message + 5-star review from antoniodela

5.2 Removing Subjectivity From Reviews

- **Reference track = contract:** When a buyer sends a reference, confirm it in writing. "Got it — I'll use [track] as the tonal target." Now they can't say they wanted something different after delivery.
- **Document every revision in the order chat.** "Adjusted the low-mid around 300Hz as requested." Creates a paper trail that protects you if a dispute opens.
- **Ask for sign-off before completing:** "Does this mix work for your release? If so, I'll close the order." A buyer who says yes and leaves a 3-star is contradicting themselves. Fiverr CS will side with you.

5.3 The "Studio Session" Follow-Up

This message goes out **5–7 days after delivery** — after the buyer has used the mix in a real context. It generates more reviews and repeat orders than any other single action.

FOLLOW-UP — 5-7 DAYS AFTER DELIVERY

Hey — hope the track has been sounding good out in the world.

Curious how it held up in the session or on the speakers. If you have a minute, a quick review on Fiverr goes a long way — and if you've got another record coming, just hit me directly.

— Sfooxbeats

Why 5–7 days and not 24 hours: At 24h the buyer hasn't used the mix. At 5–7 days they've played it on monitors, in the car, shown it to people. They have a real opinion. The "how did it hold up" framing invites a story — stories become detailed reviews.

REAL VERIFIED 5-STAR REVIEWS — THE RESULT OF THE FOLLOW-UP SYSTEM IN ACTION

5.4 Building a Client Roster

The real money isn't in the orders. It's in the repeat orders. Three buyers in my history account for over \$12,000 in combined spend — because I delivered consistently and made it easy to come back.

BUYERS WHO HAVE PURCHASED GIGS FROM YOU.				
BUYER NAME	COMPLETED ORDERS	AMOUNT SPENT	LAST ORDER	
 antoniodela User Profile History	1	\$150	May 21, 26	
 tvlewis68 User Profile History	59	\$5,646	May 20, 26	
 jovanheer User Profile History	4	\$290	May 19, 26	
 pcronin20 User Profile History	2	\$135	May 18, 26	
 ethantheniceguy User Profile History	54	\$3,025	May 17, 26	
 happy202020 User Profile History	58	\$2,263	May 12, 26	
 jcat_28 User Profile History	23	\$696	May 07, 26	
 herecomesfriday	1	\$90	May 05, 26	

top repeat buyers with order counts and total spend

- **Deliver faster than the deadline, every time.** Artists talk to each other. Being the person who delivers early is a reputation that compounds across clients.
- **Make direct contact easy.** Every delivery: "For the next one, just message me directly — no need to go through search again." Bypasses Fiverr's algorithm entirely.

5.5 From One-Off to Retainer

RETAINER PROPOSAL — AFTER 3+ ORDERS

Hey — we've been working together a few months and you're releasing consistently. I wanted to offer something that might make more sense than ordering one by one.

I can set up a monthly arrangement — *[X]* mixes + masters per month for a flat \$*[X]*. Locked-in rate, priority delivery, no back-and-forth on pricing each time.

5.6 Handling Negative Reviews for Service Work

- **Wait one hour.** Never respond immediately — responding while frustrated always makes it worse.
- **Acknowledge what's valid.** If the mix wasn't right, say so without excuses. Buyers and future prospects respect honesty.
- **State what you did and offered.** "I offered a full re-mix after delivery. The buyer declined." Facts protect you publicly.
- **Close professionally.** "I stand behind my work across 2,000+ orders. Happy to make it right for anyone who gives me the chance." One line. Done.

Quick-Start Checklist

Everything in this PDF on one page. Use it before you publish your service gig. Use it again when orders slow down.

POSITIONING

- ☐ Gig title sells an outcome, not a process
- ☐ You know which 3 buyer types to target
- ☐ Bio leads with proof, not biography
- ☐ Service ladder mapped out (beat → mix → full prod)

GIG SETUP

- ☐ Title uses outcome + niche formula
- ☐ 3 tiers priced correctly (Standard is the money-maker)
- ☐ Gallery: result statement + proof + deliverables + process
- ☐ 5 specific tags — no broad terms
- ☐ Genre price map checked — you're not undercharging
- ☐ 4 FAQs covering stems, revisions, reference, ownership

CLIENT MANAGEMENT

- ☐ Pre-purchase question ready to paste
- ☐ Broken stems response script ready
- ☐ Delivery file checklist visible
- ☐ Briefing template saved and ready to send
- ☐ Direction change response ready
- ☐ Reference track confirmed in writing before starting

PRICING & REVIEWS

- ☐ Reference track close script ready
- ☐ Delivery message personalised (not generic)
- ☐ Repeat buyers identified — direct line established
- ☐ Brief response for service work drafted
- ☐ Follow-up set for 5–7 days post-delivery
- ☐ Public negative review response template ready

YOU'RE NOT DONE

What's Next

You've got two lanes now: beats and services. Course 03 is the full system — how to run both simultaneously, build your brand off-platform, and turn it all into a full-time income.

- Complete outreach system — off-platform clients from Instagram, SoundCloud, YouTube
- 30-day content calendar that drives Fiverr traffic (no dancing required)
- The client retention ladder — turning \$30 buyers into \$3,000 clients
- Week-by-week 90-day roadmap to your first \$1k month
- Notion workspace template included

Course 03 — Full Freelance Music Producer Playbook

\$47 • loopgem.com

Or skip to the fast lane — book a 1-on-1 and I'll apply this to your actual profile, live.
